CEO Bohn Crain Comments on Results

"Our results for the quarter ended September 30, 2023 continue to reflect the difficult freight markets being experienced by the entire industry as well as our operations." said Bohn Crain, Founder and CEO of Radiant Logistics. "The confluence of shippers continuing to manage through elevated inventories, reduced imports and slowing economic growth, has had a cascading effect across virtually every mode of transportation. As in the prior quarter, these market conditions have negatively impacted not only our current results, but also the year-over-year comparison to our record results for prior year period. With that said, we remain optimistic that we are at or near the bottom of this cycle and would expect markets to begin to find their way to more sustainable and normalized levels in coming quarters."

Mr. Crain continued, "Notwithstanding the tough year over year comparisons, we are very proud to report that we generated \$9.2 million in Adjusted EBITDA and \$7.9 million in cash from operations for our fiscal quarter ended September 30, 2023. In addition, we continue to enjoy a strong balance sheet finishing the quarter with approximately \$35.9 million of cash on hand and nothing drawn on our \$200.0 million credit facility.

As previously discussed, we believe we are well positioned to navigate through these slower freight markets as we find our way back to more normalized market conditions. At the same time, we believe our patience and discipline may be rewarded as market conditions become more conducive to our acquisition strategy and we have ample "dry powder" to become more active on the acquisition front should the opportunity present itself. Looking ahead, we will remain focused on delivering profitable growth through a combination of organic and acquisition initiatives and thoughtfully re-levering our balance sheet through a combination of agent station conversions, synergistic tuck-in acquisitions, and stock buy-backs. Through this approach we will continue to scale our business, leveraging our best-in-class technology and extensive global network, which we believe, over time, will continue to deliver meaningful value for our shareholders, operating partners, and the end customers that we serve."

Reconciliation of Non-GAAP Measures RADIANT LOGISTICS, INC.

Reconciliation of Gross Profit to Adjusted Gross Profit, Net Income Attributable to Radiant Logistics, Inc. to Adjusted Net Income, EBITDA, Adjusted EBITDA, and Adjusted EBITDA Margin (unaudited)

As used in this report adjusted gross profit, adjusted net income, EBITDA, adjusted EBITDA, and adjusted EBITDA margin are not measures of financial performance or liquidity under United States Generally Accepted Accounting Principles ("GAAP"). Adjusted gross profit, adjusted net income, EBITDA, adjusted EBITDA, and adjusted EBITDA margin are presented herein because they are important metrics used by management to evaluate and understand the performance of the ongoing operations of Radiant's business. For adjusted net income, management uses a 24.5% tax rate to calculate the provision for income taxes to normalize Radiant's tax rate to that of its competitors and to compare Radiant's reporting periods with different effective tax rates. In addition, in arriving at adjusted net income, the Company adjusts for certain non-cash charges and significant items that are not part of regular operating activities. These adjustments include income taxes, depreciation and amortization, net interest expense, share-based compensation, change in fair value of contingent consideration, transition costs, lease termination costs, acquisition related costs, ransomware related costs, litigation costs, change in fair value of interest rate swap contracts, and gain on foreign currency transaction.

We commonly refer to the term "adjusted gross profit" when commenting about our Company and the results of operations. Adjusted gross profit is a non-GAAP measure calculated as revenues less directly related operations and expenses attributed to the Company's services. Adjusted gross profit is calculated as GAAP gross profit exclusive of depreciation and amortization, which are reported separately. We believe adjusted gross profit is a better measurement than are total revenues when analyzing and discussing the effectiveness of our business and is used as a portion of a key metric the Company uses to discuss its progress.

EBITDA is a non-GAAP measure of income and does not include the effects of interest, taxes, and the "non-cash" effects of depreciation and amortization on long-term assets. Companies have some discretion as to which elements of depreciation and amortization are excluded in the EBITDA calculation. We exclude all depreciation charges related to property, technology, and equipment and all amortization charges (including amortization of leasehold improvements). We then further adjust EBITDA to exclude share-based compensation expense, changes in fair value of contingent consideration, expenses specifically attributable to acquisitions, ransomware incident related costs, changes in fair value of interest rate swap contracts, restatement costs, transition and lease termination costs, foreign currency transaction gains and losses, extraordinary items, litigation expenses unrelated to our core operations, and other noncash charges. While management considers EBITDA and adjusted EBITDA useful in analyzing our results, it is not intended to replace any presentation included in our condensed consolidated financial statements.

We believe that these non-GAAP financial measures, as presented, represent a useful method of assessing the performance of our operating activities, as they reflect our earnings trends without the impact of certain non-cash charges and other non-recurring charges. These non-GAAP financial measures are intended to supplement the GAAP financial information by providing additional insight regarding results of operations to allow a comparison to other companies, many of whom use similar non-GAAP financial measures to supplement their GAAP results. However, these non-GAAP financial measures will not be defined in the same manner by all companies and may not be comparable to other companies. Adjusted gross profit, adjusted net income, EBITDA, adjusted EBITDA, and adjusted EBITDA margin should not be considered in isolation or as a substitute for any of the condensed consolidated statements of comprehensive income prepared in accordance with GAAP, or as an indication of Radiant's operating performance or liquidity.
